

# Fundamental Properties and Advanced Modeling Expert Task Group (ETG)

# Role of ETG

- Facilitate the discussion by the overall community on ongoing and planned research
- Forum for the exchange of ideas on what research and technology are needed to provide basic knowledge on HMA factors that affect pavement performance
- Provide ideas on the applicability of research and possible future direction for planned and current research
- Provide ideas on how research should be moved forward into application in standard practice.
- Provide a forum for discussion of emerging issues
